Short description:

3d Printed RC Motorcycle

Description:

https://youtu.be/In__RP3M1RM https://youtu.be/X_VZ3BBEQh4 https://youtu.be/3K6FFrhkM0c This is a brand new motorcycle. It builds upon the knowledge gained with my previous bikes, but where those were a proof of concept, this is the final product. This 1/8 size Racing Motorcycle is far more advanced and has been completely redesigned with knowledge gained from actual RC motorcycle designers and racing enthusiasts whose invaluable input was incorporated into the design. This is not meant to be a good 3d printed RC motorcycle, but a serious new RC Motorcycle variant that people can build, design and race at the track. Version 2: Completely redesigned from Version 1, Slimmer Body, Narrower chassis, Center of gravity has been moved back and towards the center of the bike, rear gyro, three piece front rim, and electronics are stored on chassis. Built and Engineered by: Brett Turnage bti3dlabs.com @3dprintracetech Assembly Manual: https://drive.google.com/open?id=0By6c8kTN8KnBR2dsVHhZU1k3TUE Parts List: ihttps://drive.google.com/open?id=0By6c8kTN8KnBcnFzY3hVVUlMNFE Instructables build: https://www.instructables.com/id/2016-Suzuki-GSX-RR-18-Racing-RC-MotoGP-Version-2/

If you can, please use the online documentation found at http://www.youmagine.com/designs/2016-suzuki-gsx-rr-1-8-racing-rc-motogp-version-2 because those may have been been updated. Also, there you can interact and provide praise and/or feedback.
